

What do they
THINK AND FEEL?

what really counts
major preoccupations
worries & aspirations

Diabetic Retinopathy

In others,
abnormal new
blood vessels
grow on the
surface of the
retina.

The early stages do
not have any
symptoms , some
notice change in
vision .

In later blood
vessels in retina
start to bleed
into vitreous .

**NEOVASCULAR
GLAUCOMA :**
Fluid drain out
of eye .

DME : Diabetic
macular edema ,
and this causes
blurry vision and
fluctuating vision
in eyes.

**This DR can
lead to other
serious eye
conditions ;**

This can pull the
retina away
from the back
of the eye .

stimulates
the growth of
scar tissues
leads to ocular
vision .

The abnormal
blood vessels
associated
with DR .

What do they
SEE?

environment
friends
what the market offers

What do they
HEAR?

what friends say
what boss say
what influencers say

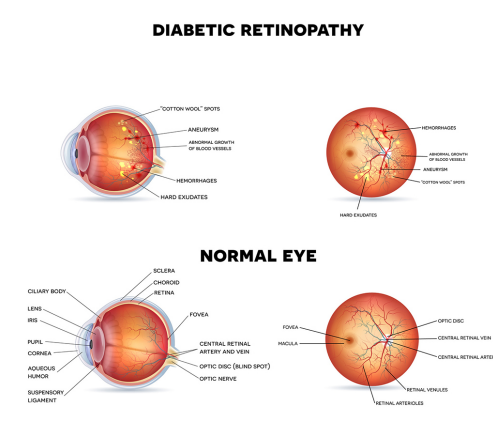

What do they
SAY AND DO?

attitude in public
appearance
behavior towards others

- ✓ Spots or dark strings
floating in your vision
(floaters)
- ✓ Blurred vision
- ✓ Fluctuating vision

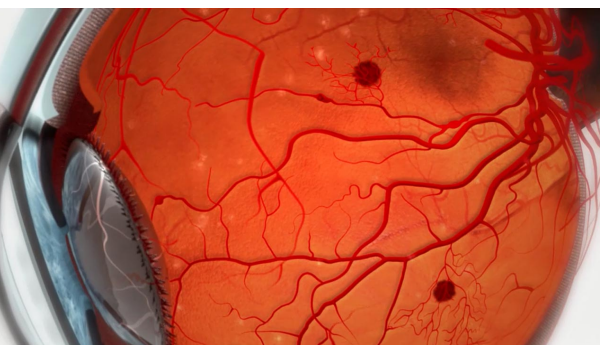

The part of our eye
which detects the
light and send
signals to brain
gets damage
usually.

This cause due
to high much
sugar in blood
can
damage retina .

PAIN

fears
frustrations
obstacles

- ✓ Dark string &
colorless spots
floating in visual
field , Double vision
.

- ✓ Blurry vision.
- ✓ Inability to see
colors.
Fluctuations in
vision.
- ✓ Deteriorating
night vision.

GAIN

"wants" / needs
measures of success
obstacles

Only the early
detection of DR
can be curable .

For the early
detection of DR
the image of
etian is procesed
and detected .
